CLEANING & MAINTENACE

Both new and used vests should be thoroughly inspected before use to ensure no damage is present. Vests should not be left in contaminated state if re-use is intended, more especially if a potential hazard exists. Befpre removal, if a hazard exists the the contaminant should first be removed. However if this is not possible the vests should be removed without the contaminant contacting the body.

STORAGE

Store the vest in the original packaging in a cool dry place & out of direct sunlight.

OBSOLESCENCE

Stored correctly, the vests physical properties will not change for up to two years.
